Sundance Technologies
West Africa Limited RC: 1497579

COMPANY BROCHURE

Marine services & energy value chain consultancy

About Us

Sundance Technologies West Africa Limited supports marine and energy operators across West Africa.

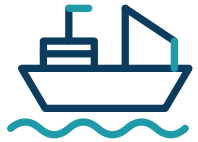

We combine hands-on marine project experience with technical and commercial advisory. Our work helps clients define project requirements, evaluate options and organize the support needed for delivery.

Our Values

Diligence Integrity Resilience Excellence

Business units

Sundance Marine Services

Vessel chartering and ship management, offshore logistics, port cargo support and marine project coordination.

Sundance Energy Advisory

Technical, commercial and regulatory advisory for operators, contractors, investors and equipment providers.

Sundance Energy Infrastructure

Project advisory for shallow-water oil-and-gas field development and its specialist delivery interfaces.

Operational support at the vessel, port and offshore interfaces

- OSV chartering
- Marine asset sale and purchase advisory
- Technical and commercial ship management
- Offshore logistics support
- Drilling campaign marine support
- Marine project management
- Port and cargo services

Vessel representation and management

Chartering representation

Market intelligence, specification matching, charterer engagement and commercial negotiation on the owner’s behalf.

Asset transactions

Sale and purchase advisory, opportunity screening and support for technical and commercial evaluation.

Ship management

Survey and audit attendance, operational reporting, technical support coordination and owner budget oversight.

Ports, cargo and offshore logistics

Cargo superintendency

Loading, discharge and storage oversight, with cargo condition and quantity verification.

Port coordination

Liaison with terminals, stevedores and port authorities, including importation process support.

Offshore logistics

Marine coordination, transport planning and the shore-base interfaces supporting an offshore campaign.

Marine support for offshore campaigns

Sundance coordinates the marine layer of a project alongside the operator, rig contractor and appointed specialists.

Drilling and rig moves

Anchor-handling and positioning support, rig-move coordination and deck cargo supply logistics.

Subsea and installation interfaces

Campaign planning, vessel evaluation and marine interfaces for IMR, ROV, diving and installation scopes.

Sundance Energy Advisory

Advisory shaped around a development decision, a bid, an investment case or a compliance obligation.

- Energy value-chain consultancy
- Business case development
- Technical and commercial advisory
- Regulatory compliance advisory
- Equipment procurement advisory

Business Cases And Organizational Change

Project And Investment Cases

Technical specifications, delivery partner evaluation, payment structures and project-finance assumptions for marine, subsea and heavy transport scopes.

Sundance Change Management Framework

Our framework considers talent and technology, assets, and regulatory requirements together when an organization enters a new market or adopts a new operating model.

Sundance Energy Infrastructure

Project Advisor for shallow-water oil-and-gas field development

We help operators frame development options, engage specialist partners and review the interfaces between field definition, engineering, fabrication, drilling and marine execution.

Field Development Advisory Scope

Opportunity and concept

Field information, development options and data gaps.

Engineering and facilities

Field-development, FEED, subsea, topside and EPF interfaces.

Partners and procurement

Vendor capability, package scope and delivery assumptions.

Drilling and marine access

Rig screening, mobilization and installation readiness.

Milestones and handover

Milestone reviews, commissioning interfaces and handover.

How we structure an engagement

Define

An agreed project basis, scope boundaries and the decision required.

Evaluate

Technical and commercial options, evidence gaps and risk priorities.

Connect

A partner engagement plan and clear package responsibilities.

Support

Readiness reviews, action tracking and progress at agreed milestones.

Project History

2025 / Port Harcourt

FPSO project cargo superintendency and marine coordination for an independent E&P operator, delivered through its energy partner.

2023 / Port Harcourt

Third-party fleet assurance surveys covering MEDEVAC boats, crew transport vessels and PSVs, delivered through a marine services partner.

2022 / Lagos

Heavy transport studies for Piperack modules

Energy Advisory Experience

New-build OSV deployment

West Africa operations and market-entry strategy, including regulatory compliance, vessel registration and local content.

Marine portfolio diversification

Market analysis across subsea and pipeline IMR, technology adoption and a Change Management Framework program.

Early production facility

Technical design and fabrication partner evaluation, with project finance structuring for a shallow-water field scope.

Risers and flowlines

Technical and commercial advisory for shallow-water riser and flowline design, fabrication and installation.
